PROFILE

Analytical problem solver with 5+ years in process automation and real estate analytics at RCLCO, now focused on full-time software development. My portfolio showcases full-stack projects featuring data analytics, AI integration, CRUD database operations, authentication/social features, and a responsive UI/UX optimized for web and mobile.

SOFTWARE SKILLS

JavaScript, Python, React, React Native, HTML, R, JSX | Node.js, Git, Expo, Firebase | Tailwind, CSS, Nativewind

TECHNICAL PROJECTS

Full Stack Portfolio – [Mikeweaver.dev](https://mikeweaver.dev) – Washington, DC January 2025 – Present

AI Chef | React, React Native, Node.js, Firebase, OpenAI API, Expo

- Architected a cross-platform AI recipe generator, **optimizing performance and UI** across iOS, Android, and Web
- Engineered **RESTful API endpoints** to process asynchronous OpenAI requests and persistent **Firestore** storage.
- Managed the full release lifecycle, successfully deploying native builds to the **App Store and Google Play**

Voyage | React, Firebase Auth, Firestore, Tailwind CSS

- Developed a social platform featuring **secure authentication** and real-time **CRUD operations** for social feeds
- Built a modular, responsive UI using **Tailwind CSS**, optimizing performance across mobile and desktop

CensusView | R, R-Shiny, CSS, Census API

- Built a geospatial analytics engine fetching and cleaning **4M+ data points** via the U.S. Census Bureau API
- Optimized data processing in **R** to render interactive GIS maps

SpotifyLab | React Native, Nativewind, Spotify API, OpenAI API

- Integrated **OAuth 2.0** and **Spotify Web API** to automate playlist curation based on AI mood analysis
- Implemented high-fidelity mobile UI using **Nativewind**, borrowed from native Spotify design patterns

RCLCO – Washington, DC

September 2020 – January 2025

Business Intelligence Team – Secondary Role

- Engineered interactive web tool for a large real estate development company to help analyze different submarkets based on variable investment criteria
- Built a web scraping application that integrated within the company workflow to collect rent data, allowing RCLCO to automatically update market rents daily
- Accessed millions of data points from the Census API; synthesized large-scale demographic data into clean, user-friendly web app that has been accessed by thousands of users
- Automated PowerPoint development process by delivering several company-specific VBA packages

WORK EXPERIENCE

RCLCO – Washington, DC

September 2020 – January 2025

Senior Associate (2024 - 2025)

- Managed teams through financial modeling and market analysis for several multi-billion dollar projects
- Developed bespoke market selection tools, tax analysis, and pricing models to better inform partners

Associate (2022 - 2024)

- Routinely worked in small project teams (3-6 people) to engineer comprehensive fiscal impact models
- Projected key revenue, absorption, and underwriting metrics across uses for sports-anchored developers

Analyst (2020 - 2022)

- Specialized in residential feasibility to deliver supply, demand, and demographic data to clients

EDUCATION

University of North Carolina at Chapel Hill, Kenan-Flagler Business School, Honors College

May 2020

BS Business Administration, BA Economics, Minor in Astronomy, GPA 3.8

- UNC Honors College Student, Phi Beta Kappa, Dean's List, High School Salutatorian
