PROFILE

Analytical problem solver with 5+ years in process automation and real estate analytics at RCLCO, now focused on full-time software development. My portfolio showcases full-stack projects featuring data analytics, AI integration, CRUD database operations, authentication/social features, and a responsive UI/UX optimized for web and mobile.

TECHNICAL PROJECTS & PORTFOLIO

Full-Stack & AI-Driven Web + Mobile Portfolio – Washington, DC January 2025 - Present
mikeweaver.dev

- **CensusView:** A geospatial analytics app with millions of cleaned data points via census API
- **Voyage:** A social travel platform with authentication, profiles, follows, posts, and likes
- **AI Chef:** An AI-assisted cooking app powered with responsive UI and persistent data
- **SpotifyLab:** A Spotify + AI-powered playlist generator using Spotify and OpenAI APIs

RCLCO – Washington, DC September 2020 – January 2025
- Business Intelligence Team – Secondary Role

- Accessed millions of data points from the Census API; synthesized large-scale demographic data into clean, user-friendly web app that has been accessed by thousands of users
- Built a screen-scraping application that integrated within the company workflow to collect rent data, allowing RCLCO to automatically update market rents daily
- Engineered interactive web tool for a large real estate development company to help analyze different submarkets based on variable investment criteria
- Automated PowerPoint development process by delivering several company-specific VBA packages

WORK EXPERIENCE

RCLCO – Washington, DC January 2024 – January 2025
Senior Associate

- Led teams through financial modeling and market analysis for several multi-billion dollar mixed-use projects
- Developed bespoke market selection tools, tax analysis, and pricing models to better inform partners
- Independently delivered complex economic and fiscal impact analyses to key stakeholders

RCLCO – Washington, DC January 2022 – January 2024
Associate

- Routinely engineered large and comprehensive fiscal impact models from scratch, often communicating directly with jurisdiction heads to supply info for their taxes and budgeting
- Projected key revenue, absorption, and underwriting metrics across uses for sports-anchored developers

RCLCO – Washington, DC September 2020 – January 2022
Analyst

- Specialized in residential feasibility to deliver supply, demand, and demographic data to clients
- Synthesized large datasets to help stakeholders better understand the BTR and Active Adult landscape

EDUCATION

University of North Carolina at Chapel Hill, Kenan-Flagler Business School, Honors College May 2020
BS Business Administration, BA Economics, Minor in Astronomy, GPA 3.8

- UNC Honors College Student, Phi Beta Kappa, Dean's List, High School Salutatorian

SOFTWARE SKILLS

Javascript, Python, HTML, R | JSX, React, Expo | NativeWind, Tailwind, CSS | Firebase
